This Annotated Bibliography of References is intended for use by coastal districts in researching topics related to coastal management standards and district policies. The Annotated Bibliography of References includes six different documents:

- General Habitat References
- General References for ACMP Standards (Not Including Habitat) – Table 1
- Annotated Bibliography Tables, Northwest Region – Tables 2A and 2B
- Annotated Bibliography Tables, Southwest Region – Tables 3A and 3B
- Annotated Bibliography Tables, Southcentral Region – Tables 4A and 4B
- Annotated Bibliography Tables, Southeast Region – Tables 5A and 5B

The first two documents, plus the correct set of annotated bibliography tables for a region, constitutes a complete Annotated Bibliography of References for that region. For example, a complete Annotated Bibliography of References for the Northwest Arctic Borough would consist of the General Habitat References, the General References for ACMP Standards (Not Including Habitat), and the Annotated Bibliography Tables, Northwest Region.
